

## Time Machine - Song Lyrics

They want you all good  
No one could do anything to tear us apart  
And we haven't got more met  
And I've messed up and did the unthinkable

I wish I could go, back in time again  
Find a place we met in love  
Wish I could go, what time is it?  
Replace what you and me, what we had  
I had a time why I had to leave you  
Waiting until I take my dirt bag, come home to you  
Now when it's on time you would have moved on  
Now it feels like the end of the world cause I'd die without you

Cause I never hurt the same, what I'm do with you?  
Can no other woman hold me down like you  
Now I'm going out there  
Somebody press fast forward into the future  
Say I can't go back in time, I'd try to undo it  
I wish I could go, back in time again  
Find a place we met in love  
Wish I could go, what time is it?  
Replace what you and me, what we had

If I had a time machine  
If I had a time machine  
If I had a time machine  
When it goes wrong, I would go in and I would fix it  
All the times I was late and I never mind  
All those girls I had most close and they didn't care  
I would re-trace all of my self's in time

I wish I could go back in time again  
Find a place we were making love  
Wish I could go through a time machine  
Replace what you and me, what we had  
I've got a time machine  
Uh baby if I had a time machine I would go back  
I would go back in time.
